

EatAndShare

EatAndShare is a dynamic web application designed to create a community-driven recipe platform. The core goal of the project is to allow users not only to access a wide range of recipes but also to contribute their own, interact with others, and engage with food content in an interactive way. By supporting persistence, logging, and robust error handling, the system ensures both reliability and maintainability.

Features

- **User Accounts & Authentication**
Users can register, log in, and manage their accounts securely
- **Recipe Uploads**
Authenticated users can upload recipes with details such as ingredients, cooking time, and preparation steps.
- **Categorization**
Recipes can be browsed and filtered by categories (e.g., vegan, vegetarian, breakfast, lunch, dinner).
- **Search Functionality**
A keyword-based and filter-based search enables users to quickly find relevant recipes.
- **Ratings & Favorites**
Users can rate recipes and mark favorites for quick future access.
